## WHERE DRUGGISTS FLOURISH.

## How the Business is Run in the South American Republics.

Latin Americans are great believers in medicines and, due to the scarcity of physicians, are obliged to "doctor" themselves. Pharmacy is consequently profitable. With the exception of modern Europe, Canada and the United States, pharmacy is practiced in other lands of the world much as it was in the United States seventy-five or a hundred years ago, and this is particularly true of the republics to the south of us.

The individual druggist makes his own pills, extracts, tinctures, infusions and pulverizes his own crude drugs. Soda water fountains are few. The usual rubber goods, toilet articles, soaps, perfumes, instruments and sundries are carried.

Each druggist makes a line of his own specialties which he pushes. In addition to the standard drugs and medicines, he also carries remedies and medicaments known only in his immediate vicinity. They are mostly of Indian origin, compounded from roots, herbs or other ingredients, produced only in the country where he lives. These find a ready sale among all classes.

Superstitious ideas are prevalent, and these are frequently taken advantage of by the unscrupulous. One pharmacist made a fortune selling Indians, half castes, and whites, for that matter, too, "pink love powders" and "white love powders." The white love powder was pulverized sugar, while the pink love powder was made of the same material colored. Indians would walk hundreds of miles to buy this precious powder.—Leslie's Weekly.

## THE GARDEN OF EDEN.

## It Is Said to Have the Most Trying Climate in the World.

The chief peculiarity about Kurna is that the natives believe the place where they live is the exact site of the garden of Eden.

The climate of Kurna is acknowledged to be the most trying in all the world. The heat is terrific in the summer time. It is claimed that the British government has a record of 150 degrees in the shade upon the bridge of a boat anchored in the river at Bureh, a little to the south.

The missionaries at Bureh tell of nights when the thermometer registers not less than 125 degrees. British sailors bound for the Persian gulf in the summer time usually desert if they can. Perhaps in Arizona the thermometer rises nearly as high, but there is the dry air, while in the Persian gulf it is exceedingly moist.

The Europeans at Bureh must pass the days in underground chambers, or serais, while a native boy pulls a huge fan, or punkah, suspended from the ceiling to keep the air in circulation. The nights are spent on the roof, for it is impossible to sleep below.

In the winter time the air seems exceedingly cold, for the marshes are filled with salt, and as the wind sweeps over the plain the moist air is peculiarly penetrating. Frequently the Arab, benumbed by the cold, falls from his horse.—Christian Herald.

## Where Plato Taught.

The famous academy of Plato was in a suburb of Athens, about a mile north of the Dnyllum gate. It is said to have belonged to the hero Academus; hence the name. It was surrounded with a wall and adorned with walks, groves and fountains. Plato possessed a small estate in the neighborhood and for some fifty years taught his "divine philosophy" to young and old assembled in the academy to listen to his wise words. After Plato's death in 348 B. C. the academy lost much of its fame, but the beauty remained for centuries after the great teacher was no more.—New York American.

## The Margin of Leisure.

A broad margin of leisure is as beautiful in a man's life as in a book. Haste makes waste no less in life than in housekeeping. Keep the time, observe the hours of the universe, not of the cars. What are three score years and ten hurriedly and coarsely lived to moments of divine leisure in which your life is coincident with the life of the universe? We live too fast and coarsely, just as we eat too fast and do not know the true savor of our food. We consult our will and understanding and the expectation of men, not our genius.—Thoreau.

## Inducements to Matrimony.

There prevails in some parts of Brittany a curious marriage custom. On certain fete days the marriageable girls appear in red petticoats, with white or yellow borders around them. The number of borders denotes the portion the father is willing to give his daughter. Each white band denotes 100 francs per annum; each yellow band represents 1,000 francs a year.

## Volcano Made by Man.

At Brule, France, is the most remarkable volcano made by man. Originally it was a mass of coal, millions of tons. One day about a century ago the coal caught fire, and it has never ceased burning. The summit of the smoldering mass has a genuine crater.

## STOP THAT ACHE

Don't worry and complain about a bad back. Get rid of that pain and lameness! Use Doan's Kidney Pills. Many Barre people have used them and know how effective they are. Here's a Barre case.

Mrs. E. B. Lewerenz, 14 First street, Barre, says:

"I was so bad with backache I couldn't do any work, such as washing or any heavy lifting. Doan's Kidney Pills quickly removed the trouble. Another of the family suffered terribly from kidney complaint, especially backache. Different medicines were taken and doctors were consulted, but with no benefit until Doan's Kidney Pills were used. They made a permanent cure."

Price, 50c at all dealers'. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Lewerenz had. Foster-Milburn Co., Props., Buffalo, N. Y.—Adv.

## Tunnels.

A New York newspaper remarks that "ferries come and ferries go, bridge rise and bridges fall, but tunnels last forever." There is a scientific truth in the observation. Of all works of man earthworks, plain earth mounds sodded over, are about the most enduring. A properly constructed tunnel is essentially a work in earth and so almost as permanent as the great globe itself.—Exchange.
